

《2024年中考英语阅读理解专项训练及答案（67）》

Last week, my class and I went to the zoo for a field trip. We were all excited to see the different animals and learn about them.

As soon as we entered the zoo, we could hear the roar of the lions and see the elephants wandering around their enclosure. The monkeys were swinging from the trees and making funny faces at us.

Our teacher divided us into groups and assigned each group an animal to study. My group was assigned the pandas. We learned that pandas are native to China and mainly eat bamboo. They are also endangered, which means we need to protect them.

After studying the pandas, we went to see the giraffes. They were so tall and elegant, with their long necks and spotted patterns. We fed them some leaves and watched as they gracefully chewed.

Later, we visited the penguin enclosure. The penguins were swimming in the cold water and looked so cute with their round bodies and wings that looked like flippers. Some of them even jumped out of the water and performed flips in the air.

Finally, we ended our trip with a visit to the petting zoo. There, we had the opportunity to pet and feed some of the smaller animals, like rabbits and chickens. It was a great way to end the day and make some close connections with the animals.
