

《单词百科:auxin是什么意思?auxin怎么发音?auxin的解释和用法》

英语单词auxin是什么意思?auxin怎么读?auxin怎么发音?简答网为您整理了auxin的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

auxin怎么读

auxin的读音:[:ks n]

auxin的意思

1、n.植物生长素，植物激素;茁长素;

auxin的相关词组

- 1、 auxin migration [医]植物激素转移;
- 2、 free auxin 自由生长激素，自由生长素;
- 3、 natural auxin 天然生长素;

4、synthetic auxin 合成生长激素;

5、bound auxin 束缚生长激素;

auxin的双语例句

1、Whenever a plant responds to applied , i . e . , unbalanced, applications of auxin, ethylene is produced.

当一植物对不平衡地施用生长素起反应时,总是产生乙烯.

2、Auxin homeostasis, polar transport and signaling affect the whole progress of leaf development.

生长素的稳态调控、极性运输和信号转导影响叶片发育的全过程.

3、It has been reported that ARF gene expression was not effected by auxin concentration.

已有报道说ARF基因的表达都不受生长素浓度的影响.

4、Apical buds produce a growth hormone called auxin.

顶芽分泌出叫做生长素的生长类激素.

5、These bars buds themselves also produce auxin.

而这些叶芽本身也可以生成生长素.

6、Leaf fall The shedding of leaves , usually associated with a fall in AUXIN concentration.

落叶:即树叶的脱落,常伴植物激素浓度的降低.

7、These bats buds themselves also produce auxin.

这些花蕾本身也会产生茁长素.

8、Also unlike auxin, cytokinins promote the growth of lateral buds , not shoot tips.

同样不同于生长激素,细胞分裂素促进侧芽的生长,而不是顶芽的生长.

9、These buds themselves also produce auxin.

这些芽本身还生产出生长素.

10、 Normally, the T-DNA region contains genes for auxin and cytokinin biosynthesis and for amino acid and sugar derivative production.

通常T-

DNA区都含有生长素和细胞分裂素合成基因以及氨基酸和糖类衍生物合成基因。
