也许你遇到过这种囧况，向合作伙伴、客户阐述耗资巨大的项目时苦于没有专业词汇，而总要把金额一提再提，结果不仅自己说得啰嗦，人家听着也累。别急，小编来帮你解决这个问题^\_^今天，我们就来介绍各种巨资项目的英文说法：

Teraproject refers to a massive project, particularly one that costs a trillion dollars or more.

“?????”??

For example:

Moon building is probably a gigaproject or even teraproject.

??

??teraproject????????????????????superproject(????)?gigaprojects(????)?megaproject(????)?

Speaking pedantically, you could say that this term should be used for projects that are a million times more expensive than mere megaprojects, since tera- means "trillion" and mega- means "million."
