

## 《单词百科:manufacturable是什么意思?manufacturable怎么发音?manufacturable的解释和用法》

英语单词manufacturable是什么意思?manufacturable怎么读?manufacturable怎么发音?简答网为您整理了manufacturable的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

### manufacturable怎么读

manufacturable的读音:[mænj 'fækt r bl]

### manufacturable的意思

1、adj.可制造的;

### manufacturable的双语例句

1、Certainly, photonic components are not as inexpensive, or as readily manufacturable as electronic components are.

当然, 光电子的元件不会像电子元件那么便宜, 或者不会那么容易制造.

2、Execute test methods to ensure that prototypes are manufacturable.

执行测试方法来确保样品是可制造的。

3、It has been demonstrated that compared to simulator-based method, manufacturable deep sub-micron CMOS analog circuits can be synthesized using this system in a short run time.

大量的实验结果表明：与基于模拟器的方法相比，采用该系统可以快速综合出可制造的深亚微米CMOS模拟单元电路。

4、Certainly, photonic components are not as inexpensive, or as readily manufacturable, as electronic components are.

当然，光电子的元件不会像电子元件那么便宜，或者不会那么容易制造。

5、Not only is it lighter, stronger, harder and more flexible than steel it is also a recyclable and sustainable manufacturable product that is eco-friendly and cost effective in its use.

它不只比钢更轻，更硬，更牢固和更灵活，而且是一种环保的，可循环利用，可持续的制造产品，使用时性能价格比较高。

6、Using O-O modelling method, product definition model of box-type parts has been established. A manufacturable evaluation method of concurrent design has been proposed which based on unified data model, such as product data model, ME model process plan model.

采用面向对象方法建立了产品定义模型，在建立统一的数据模型如产品定义模型、制造环境的工艺能力模型、工艺计划模型的基础上，研究了并行设计的可制造性评价方法；

7、The thesis goes deep into the process, device physical characteristics, manufacturable design and optimization of sub-micron MOS devices. Prepares for the research of system-on-a-chip (SOC) integrative simulation and optimization in deep sub-micron process.

本课题对亚微米MOS器件工艺、器件物理特性和可制造性设计与优化进行了深入探讨，为深亚微米层次的SOC一体化仿真与优化研究打下基础。

以上是简答网为您整理的manufacturable怎么读的相关信息，希望对大家有一定的帮助。查看更多关于manufacturable的用法、manufacturable的释义、manufacturable的
