

《“公主病”用英语怎么说？》

“女神经和女神之间的差距，就差一个公主病。”湖南卫视《花儿与少年》第二季播出后，“公主病”这个词再度被大家讨论。在节目中，45岁的“女神”许晴，以纯天然无添加的娇嗲柔弱气质，震碎了一帮女汉子们的三观。有网友为许晴，发明了第13星座“许晴座”。

Princess sickness (or princess syndrome; princess disease) is a term to describe a psychological phenomenon affecting young women, especially teenagers, and can be characterized by numerous physiological disorders, including narcissistic personality disorder, egocentrism and histrionic personality disorder, consequently resulting in individuals acting like or believing that they are "princesses".
