

## 《单词百科:amino-是什么意思?amino-怎么发音?amino-的解释和用法》

英语单词amino-是什么意思?amino-怎么读?amino-怎么发音?简答网为您整理了amino-的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

### amino-怎么读

amino-的读音:[æ'mɪn ]

### amino-的意思

1、pref.表示“氨基”之义;

### amino-的相关词组

- 1、aromatic amino acid decarboxylase [医]芳香氨基酸脱羧酶;
- 2、amino sugar 氨基糖;
- 3、amino acids 氨基酸( amino acid的名词复数 );氨基酸类;

- 4、amino acid 氨基酸;
- 5、essential amino acids [医]必需氨基酸;
- 6、essential amino acid 必需氨基酸;
- 7、amino terminal 氨基末端, N末端;
- 8、amino resin 氨基树脂;
- 9、amino halide 氨基卤化物, 卤替胺;
- 10、amino oxidase 氨基氧化酶;
- 11、amino rubber 氨基橡胶;
- 12、amino black 氨基黑;
- 13、amino compound 氨基化合物;
- 14、amino acylase [化]酰化氨基酸水解酶;
- 15、amino nitrogen 氨基氮;
- 16、amino plastics [医]氨基塑料;
- 17、amino benzaldehyde [医]氨基苯甲醛;
- 18、amino group 氨基;
- 19、amino benzene [医]氨基苯, 苯胺;
- 20、diazo amino [化]重氮氨基;

### amino-的双语例句

1、Arginine accumulates extensively in some plants as a soluble amino acid.

在某些植物中,精氨酸以可溶性氨基酸大量积累.

2、These sites include, carboxyl, epoxy, amino and the like.

这些部位包括羧基、羰基、环氧基和氨基等.

3、 Little work has been done on amino sugar biosynthesis.

在氨基糖生物合成方面,工作做得很少.

4、 There are many amino acids that the body cannot synthesise itself.

有许多种氨基酸人体自身不能合成.

5、 There are many amino acids that the body cannot synthesize itself.

有许多种氨基酸人体自身不能合成。

6、 These two amino acids derive their carbon skeletons from pyruvate.

这两个氨基酸从丙酮酸获得它们的碳架.

7、 Several aminopeptidases complete the hydrolysis of peptides into amino acids.

几种氨肽酶把肽水解成氨基酸.

8、 All proteins are fabricated of compounds known as amino acids.

所有的蛋白质都是由氨基酸构成的.

9、 I turn the protein in his dinner lamb chop into amino acids.

我把他晚餐吃的羊排里的蛋白质转变成氨基酸.

10、 Alanine appears to be the preferred amino acid in the transamination.

丙氨酸在转氨作用中似乎是更好的氨基酸.

11、 Amino transferases are located in the cytoplasm, chloroplasts and microbodies.

氨基转移酶分布在细胞质、叶绿体和微体中.

12、 In deamination, the nitrogen-containing amino portion of the molecules is removed.

在脱氨作用中,分子含氨基的部分被移去.

13、 Their amino acid composition resembles that of all the other 'soluble' proteins.

它们的氨基酸组成与所有其它可溶性蛋白质相似.

14、 Little internalization of various amino acid transport sites occurs.

各种氨基酸输送位点很少发生内在化.

15、 The vacuolar amino acid pool is utilized during initiation of budding.

当出芽开始时,液泡的氨基酸库被利用.

以上是简答网为您整理的amino-怎么读的相关信息，希望对大家有一定的帮助。查看更多关于amino-的用法、amino-的释义、amino-的相关详情请点击：<https://dict.jiandongshicai.cn/amino->
