table-hop怎么读

table-hop的读音:[ˈte ɪ bl ˈh ɒ p]

table-hop的意思

1、vi.周旋于餐桌之间;

table-hop的双语例句

1、 If the route table lookup shows that the packet is destined for a non-local subnet, the router forwards the packet to the next-hop router using the next-hop router's MAC address.

如果查找路由表显示包的目的地不在本地子网，路由器就利用下一跳路由器的MAC地址把包转发给下一跳路由器。

2、Each router's routing table shows the best route to the destination address; for addresses that may be several hops away, it shows the best next-hop router.

每个路由器的路由表显示了到达目的地址的最佳路径，对于要有几跳的地址，它显示出最佳的下一跳路由器。

3、Macker said the Manet architecture involves building a routing table in which each node knows not only its neighbors one hop away but also the nodes next to those neighbors.

麦克称，Manet的体系结构包括建立一个路由表，每个节点不仅知道其“单跳”相临节点，还应知道与其他相临节点的下一个节点。
