

## 《单词百科:transmembrane是什么意思?transmembrane怎么发音?transmembrane的解释和用法》

英语单词transmembrane是什么意思?transmembrane怎么读?transmembrane怎么发音?简答网为您整理了transmembrane的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

### transmembrane怎么读

transmembrane的读音:[træns'membre n]

### transmembrane的意思

1、adj.横跨膜的;

### transmembrane的双语例句

1、By using standard microelectrode technique , we studied the transmembrane action potential on rabbit conus arteriosus ( infundibulum ).

用微电极细胞内记录法,检测了离体兔动脉圆锥各部的动作电位和传导速度.

2、The topology prediction of transmembrane protein is a hot in Bioinformatics.

跨膜蛋白拓扑结构预测是生物信息学的研究热点之一.

3、P-gp is a multiple transmembrane-spanning glycoprotein.

P-gp 是多重跨膜糖蛋白.

4、Toll-like receptors (TLRs) are one kind of transmembrane protein receptors that mediate innate immunity for host.

Toll样受体 (Toll-like receptors, TLRs) 是介导宿主天然免疫的跨膜蛋白受体.

5、The AD7C-NTP protein was predicted to have 3 potential transmembrane domains and locate on peroxisome's membrane.

AD7CNTP基因编码产物具有3个跨膜区,可能定位于过氧化物酶体.

6、Current predictors for subcellular localization primarily target soluble proteins and characteristic topological domains of transmembrane proteins.

现有蛋白质亚细胞定位方法针对水溶性蛋白质而设计,对跨膜蛋白并不适用.

7、The orientation of melittin binding to liposomes with or without transmembrane potential was investigated.

利用脂质体模型膜系统研究了跨膜电位对蜂毒肽在磷脂膜上取向的影响.

8、Transmembrane signal transmission functions of cell; The mechanics of muscle contraction.

细胞的跨膜信号转导功能; 肌肉收缩的力学关系.

9、It is the extracellular domain that binds neurotransmitters. The transmembrane domain forms an ion channel.

胞外域结合神经递质. 跨膜域形成离子通道.

以上是简答网为您整理的transmembrane怎么读的相关信息,希望对大家有一定的帮助。查看更多关于transmembrane的用法、transmembrane的释义、transmembrane的相关详情请点击：<https://dict.jiandongshicai.cn/transmembrane>
