simulation的双语例句

- 1、To make the training realistic the simulation operates in real time .

为使训练真实, 模拟是实时运行的。

- 2、Training includes realistic simulation of casualty procedures.

培训包括对急救过程的真实模拟。

- 3、A new echo signal simulation method based data matrix of point object is put forward.

回波信号模拟是合成孔径雷达模拟技术的基础。

- 4、QQ password access to the simulation, readily accessible to the next!

QQ密码获取的模拟实现, 容易看懂的要的下!

- 5、The error simulation technology of a kind of grid antenna is studied in this paper.

研究了某偏馈栅格天线的栅面误差仿真技术.

6、Simulation results agree well with measurements by HP scalar network analyzer.

HP标量网络分析仪的测试结果表明,器件的模式匹配法仿真结果与实测结果吻合很好.

7、Bluetooth server simulation code integrity, and can be used directly.

蓝牙仿真服务器源代码完整,并可以直接使用.

8、SRAM FPGA system soft simulation designed to realize bitwise write bitwise Reading.

FPGA系统的sram的软仿真设计,可以实现按位写,按位读.

9、The pilot's skills are tested through simulation.

飞行员的技术是通过模拟飞行来检测的.

10、The simulation results show that the controller designed can achieve good tracking performance.

仿真结果表明,设计的控制器能够具有较好的跟踪性能.

11、Calibration System is a very important part of Radio Frequency Simulation System (RFSS).

校准系统是射频仿真系统 (RFSS) 的重要组成部分.

12、Simulation results show: the design has realized all functions of the electronic calculator.

仿真结果表明: 设计完全实现了电子计算器的全部功能.

13、The results of calculation and EMTP simulation show the correctness of dynamic system simulation.

理论计算与EMTP数值仿真都证明了动模实验结论的正确性.

14、It builds a simulation model for analyzing the trace and dynamic clustering situation of nodes.

建立相应的仿真实验模型,对运动节点的分簇情况进行动态跟踪及分析.

15、 In order to research the deformation and failure adopting model experiment , the numerical simulation method to analyzes.

总结高陡路堑边坡变形与破坏的类型, 分析其影响因素.

16、 Both of the simulation and experimental results will be discussed with the concept of entropy.

我们将会同时呈现实验以及数值模拟的结果, 并且以[熵]的概念来对结果做进一步的讨论.

17、 The results of numerical simulation are quite close to that of the experimental measurements.

论文的数值模拟结果和试验结果非常吻合.

18、 Based on that, we carried on empirical study by data simulation means to test our model.

在此基础上, 本文还采用数据模拟的方法对提出的优化模型进行了数值分析.
