《常州一小学推出道德银行》

??????????

??

A primary school in Changzhou used a "moral" banking system to encourage good behavior among students, Nanjing-based Modern Express reported on Sunday. The school set up a department that recorded students' behavior. Students were given small cards for good behavior, and once they accumulated five cards, they could exchange them for a medium-sized card at the moral bank. Students who accumulated three medium cards each month were given the title of "morality star of the month".
