

《黑熊偷蜂蜜被照相机拍到》

??????????

????????????????????5?28??

A bear was caught stealing honey from beehives in Yanbian Korean autonomous prefecture, ybnews.cn reported on Monday. The beekeepers first reported that a bear had raided the beehive bases on May 28.

The next day an infrared camera was set up after bear excrement, footprints and hairs were found at the spot. The recordings showed that a black bear was to blame for the beehive lootings during the night.
