

## 《单词百科:Rino是什么意思?Rino怎么发音?Rino的解释和用法》

英语单词Rino是什么意思?Rino怎么读?Rino怎么发音?简答网为您整理了Rino的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

### Rino的意思

1、[人名]梨乃;

### Rino的双语例句

1、 Microtubules cannot be both the birefringent material and the elements that cause chromosome separation.

微管既不是双折射物质也不是引起染色体分开的成分。

2、 Microtubules are also used in the construction of centrioles , basal bodies , cilia and flagella.

微管还用于建造中心粒,基体,纤毛和鞭毛。

3、 Microtubules have dominated our think about the mitotic mechanisms.

微管促使我的思考有丝分裂的机制.

4、 A globular protein that is the basic structural constituent of microtubules.

微管蛋白一种球蛋白,是微管的基本结构成分.

5、 Claude Makelele had to be substituted following a clash of heads with Rino Gattuso.

马克莱莱在于加图索撞头之后,被替补下场.

6、 Microtubules often have a halo around the outside which is only slightly stained.

围绕着微管的外周,常有一层仅能着色很浅的晕圈.

7、 A new method of microtubular immunofluorescence labeling in plant cells is reported here.

报道一种植物细胞微管骨架免疫荧光定位的新方法.

8、 After mitosis, these microtubules polymerize into tubulin again.

有丝分裂后, 这些微管又重新解聚成微管蛋白.

9、 It may be a sufficient but not necessary condition for microtubule organization.

对于微管组来说,它也许是更好的,但不是必需的条件.

10、 The microtubule is simplified as linear distribution of dipoles.

把微管的构象简化为若干电偶极子的线性排列.

11、 The actions of microtubule organizing centers and coated vesicles were discussed.

讨论了包被囊泡和微管组织中心可能的作用.

12、 The rod-shaped filaments of the microtubules are responsible for dividing the chromosomes in a cell.

微管杆形丝担负划分细胞中染色体的角色.

13、 Objective: To set up the fittest medium and optimum condition for plantlets to form

microtubers.

目的: 研究小植株离体条件下试管地黄诱导的最佳培养基和培养条件.

14、The protein out of which microtubules are made is called tubulin.

构成微管的蛋白质叫做微管蛋白.
