失联马航水下搜寻工作将在5-7日内结束

????MH370????????????5-7?????

The underwater search for the black box of Flight MH370 could be completed in five to seven days.

The Perth-based Joint Agency Coordination Center says it depends on weather conditions and how well the Bluefin-21 mini-sub functions.

Since Monday, Bluefin-21 has been deployed for underwater search within a 10-kilometer radius where the second signal was detected eleven days ago.
