photocatalysis的双语例句

1、The go into analysing titanium dioxide photocatalysis is difficult and insufficient.

分析二氧化钛光催化的研究困难和不足.

2、The photocatalysis principle and application of nano-titanium particles in air purification fields are summarized.

介绍了纳米半导体材料的光催化机理,净化空气的优点和国内外相关产品开发、应用的情况.

3、The higher the initial concentration of acid red B, the more difficult the photocatalysis.

酸性红B废水溶液的初始浓度越高, 光催化越难降解.

4、The photocatalysis of the semiconductive materials convert the photon energy to energy.

半导体材料的光催化效应可将光能转化为化学能.

5、Photocatalysis as one of advanced oxidation AOPs has good prospect on environmental protection.

光催化氧化作为高级氧化技术的一种在环境保护领域具有重要的应用前景.

6、This study focuses on the degradation of TNR in water using photocatalysis-membrane filtration integrated process.

研究了利用光催化 - 膜分离组合工艺降解斯蒂芬酸废水.

7、Nanometer TiO₂ thin film with photocatalysis and hydrophilicity was prepared by different method.

本论文主要研究了用不同方法制备具有光催化特性和亲水特性的纳米TiO₂薄膜.

8、Some bactericidal Methods : Were introduced. Then the mechanism and application of photocatalysis killing bacteria were reviewed.

介绍了常用的几种灭菌方法和光催化灭菌的机理及应用研究现状.
