photochromic的双语例句

1、Silver halide which has good light sensitivity is widely used in photochromic materials and photographic emulsions.

卤化银具有优良的光学特性而被广泛地应用于光致变色材料、照相感光乳剂等。

2、The optical properties of a recoverable mercury salt photochromic paint were studied.

本文介绍了一种汞盐可逆光色涂层。

3、And the light control way of photochromic liquid crystal material was summarized.

总结了光致变色液晶材料光调控的方式。

4、Fusion-welded multifocal photochromic ophthalmic lenses are composed of photochromic major lense and index segments lense.

变色熔合双光镜片由变色大片和双光小片两部分玻璃材料组成。

5、The a group at the benzopyran moiety showed reverse photochromic behavior, others were normal photochromic compounds.

在苯并吡喃部分含有硝基的螺吡喃显示出逆光致变色行为,其它的则为普通光致变色化合物。

6、These compounds showed good photochromic reactions both in solution and in PMMA amorphous film by photo-irradiation.

在光辐照下,这些化合物在溶液和PMMA膜中均具有良好的光致变色特性。

7、UV light induced deformation and bending in certain type of photochromic liquid crystal elastomers were studied.

本文研究了一类光敏液晶高弹体在紫外光照射下的变形和弯曲行为。

8、Recent research on pendant photochromic spirooxazine polymers was reviewed effect of polymers photochromic behavior was emphasized.

综述了键合螺恶嗪侧基聚合物的研究进展。

9、A non linear photochromic mask layer can be utilized for super resolution optical data storage.

利用光致变色介质的非线性效应特性制成掩膜,可以实现超分辨率光存储。
