

《单词百科:photoionization是什么意思?photoionization怎么发音?photoionization的解释和用法》

英语单词photoionization是什么意思?photoionization怎么读?photoionization怎么发音?简答网为您整理了photoionization的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

photoionization怎么读

photoionization的读音:[ˈf t a na 'ze n]

photoionization的意思

1、n.光致电离,光化电离(作用);

photoionization的双语例句

1、A liquid chromatography-photoionization-mass spectrometry method was developed for the determination of chloramphenicol antibiotics in fish meats.

用液相色谱 - 大气压光离子质谱开发出测定鱼肉中的氯霉素抗生素的方法.

2、 The using of chirped laser pulse can restrain the Rabi oscillations and realize efficiency of photoionization.

利用光脉冲的啁啾效应,可以抑制拉比振荡实现高效率的光电离.

3、 The gas is heated by photoionization.

气体是由光致电离加热的.

4、 In this paper, the construction of photoionization detect instrument based on AT 89 C 52 chip is presented.

本文介绍了基于单片机AT89C52的光离子化检测仪构建.

5、 All the atomic and molecular systems are subject to photoionization and photodissociation.

所有的原子和分子系统都受光致电离和光致离解的影响.

6、 The high laser intensity is needed in traditional photoionization which shows intensive Rabi oscillations of population.

传统的光电离需要强激发光场且粒子布居存在强烈的拉比振荡.

以上是简答网为您整理的photoionization怎么读的相关信息,希望对大家有所帮助。查看更多关于photoionization的用法、photoionization的释义、photoionization的相关详情请点击：<https://dict.jiandongshicai.cn/photoionization>
