

《单词百科:mitochondria是什么意思?mitochondria怎么发音?mitochondria的解释和用法》

英语单词mitochondria是什么意思?mitochondria怎么读?mitochondria怎么发音?简答网为您整理了mitochondria的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

mitochondria怎么读

mitochondria的读音:[, maɪ t ə ʊ 'k ɒ ndr ɪ ə]

mitochondria的意思

1、n.线粒体;线粒体(mitochondrion的名词复数);

mitochondria的双语例句

1、Chloroplasts and mitochondria are both relatively large bodies, surrounded by membranes, as is the cell itself.

叶绿体和线粒体都是比较大的实体, 它们被一层膜包着, 象细胞本身一样.

2、 Pollen grains are rich in mitochondria, Golgi apparatus, and endoplasmic reticulum.

花粉粒富含线粒体、高尔基体以及内质网上.

3、 Sarcoplasmic reticulum are well-developed and widely connect with mitochondria and nuclear envelope.

肌质网发达,与线粒体、核膜广泛联系.

4、 Mitochondria are present in all eukaryotic cells.

一切真核的细胞都有线粒体.

5、 There were abundant mitochondria, rough surfaced endoplasmic reticulum and ribosome.

胞质内有丰富的线粒体、粗面内质网、核糖体.

6、 The oxaloacetate level in the mitochondria is determined by the redox state.

线粒体中草酰乙酸水平又取决于氧化还原状态.

7、 Mitochondria do not use the universal genetic code.

线粒体并不使用通用的遗传密码.

8、 Fig .4 Yellow apex stage, showing the normal and abnormal structure of mitochondria.

图4黄梢期, 示完整的线粒体和部分降解的线粒体.

9、 Furthermore, mitochondria, the cellular power houses, seem to play a major role.

进一步, 线粒体, 细胞的能源房, 似乎也起了重要作用.

10、 They thus cut their mitochondria out of the loop.

这种作用机制效率较低,但不需要线粒体参与.

11、 Mitochondria have two membranes, an inner and an outer.

线粒体有两层膜 —— 内膜和外膜.

12、The degeneration of mitochondria is one of the earliest events in pollen abortion.

线粒体的退化是花粉败育中最早发生的现象之一.

13、It seems this reactivation also allows the mitochondria to stimulate apoptosis.

面上看,线粒体的重新激活同样会促进凋亡发生.

14、Objective Different methods and utilities of mitochondria localization were compared and selected.

目的比较和选择最佳细胞线粒体定位方法及其适用范围.

15、Mitochondria are tiny energy units within every cell of the body.

在身体每个细胞中线粒体是很小的能量单位.

以上是简答网为您整理的mitochondria怎么读的相关信息,希望对大家有一定的帮助。查看更多关于mitochondria的用法、mitochondria的释义、mitochondria的相关详情请点击：<https://dict.jiandongshicai.cn/mitochondria>
