

《单词百科:monomers是什么意思?monomers怎么发音?monomers的解释和用法》

英语单词monomers是什么意思?monomers怎么读?monomers怎么发音?简答网为您整理了monomers的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

monomers怎么读

monomers的读音:[ˈmɒnɪmɪz]

monomers的意思

1、[化学] 单体;

monomers的双语例句

1、UV varnish contains acrylic monomers, silicone equicomponent.

UV光油中含有丙烯酸单体、硅树脂等成分。

2、In this paper, the uniquely functionalized antifoulant acrylamide monomers derived are designed and synthesized.

分别以含辣素衍生结构的丙烯酰胺为防污剂、以含辣素衍生结构的丙烯酸树脂为成膜物质制备两类防污涂料。

3、Tensile strength of CPE material was increased by adding polar monomers of MA, AN and St.

极性单体MA、AN及St的加入提高了CPE材料的拉伸强度。

4、Copolymerization with other monomers such as acrylic ester and ethylene vinyl acetate was another promising way.

此外,与丙烯酸类或乙烯类化合物等单体的共聚也可改善乳液性能。

5、Silicone modified acrylic emulsions are synthesized from acrylate and monomers contained silicone group.

以丙烯酸酯和有机硅官能单体为原料,合成了有机硅丙烯酸乳液。

6、So rS 3-4 mer was digested into rS 3 monomers in vitro by 70 % formic acid treatment.

rS34mer经纯化后在酸性溶液中水解为rS3单体。

7、Determination of Residual Monomers in siliconeAcrylate Resin by Wide-Bore Capillary Gas Chromatography.

大口径毛细管气相色谱法测定硅丙树脂中的残余单体。

8、Quality is equivalent to virgin monomers.

质量相当于初次生产的单体。

9、In the same way it is possible to copolymerize three or more monomers together.

3种或3种以上单体也能以相同的方式一起共聚。

10、Plastic is made of small molecules called monomers.

塑料是由称作单作的微分子粒构成的。

11、 These monomers link together to form very long molecules called polymers.

这些单体连接在一起形成很长的称作聚合体的微分子粒。

12、 At present, most are using acrylic monomers.

目前大多使用的是丙烯酸酯类单体。

13、 Glucose molecules are thus the monomers out of which each of these polymers is constructed.

因此葡萄糖是构成这两种聚合物的单体。

14、 The article discusses blend polymerization caused by mixing prepolymer into monomers.

本文论述了预聚物溶于拟共聚单体发生原地聚合反应时的掺聚效应。

15、 A polymer that consists of two, three, or four monomers.

一种含三个相同单体的聚合物(或聚合物分子)。

以上是简答网为您整理的monomers怎么读的相关信息，希望对大家有一定的帮助。查看更
