

《单词百科:archaeopteryx是什么意思?archaeopteryx怎么发音?archaeopteryx的解释和用法》

英语单词archaeopteryx是什么意思?archaeopteryx怎么读?archaeopteryx怎么发音?简答网为您整理了archaeopteryx的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

archaeopteryx怎么读

archaeopteryx的读音:[:ki pter ks]

archaeopteryx的意思

1、n.始祖鸟;

archaeopteryx的相关词组

1、Archaeopteryx lithographica 始祖鸟

archaeopteryx的近义词

1、archeopteryx 原型视网膜

archaeopteryx的双语例句

1、Paleontologists also debated whether Archaeopteryx could fly.

古生物学家还讨论了始祖鸟是否会飞的问题。

2、However, the study of archaeopteryx has never stopped.

但是,关于始祖鸟的研究,却一直源源不断。

3、Except some with the birds similar characteristic, the archaeopteryx has the beastly foot class dinosaur's characteristic.

除了一些与鸟类相似的特征,始祖鸟具有很多兽脚类恐龙的特征。

4、Indeed, they consider the fossil's brain size decisive evidence that Archaeopteryx had what it took to fly.

确实,他们把这种化石的脑部尺寸作为有力的证据来说明始祖鸟拥有使其飞翔的东西。

5、The earliest known bird, Archaeopteryx, lived during the Jurassic, the period before the Cretaceous.

人类所知的最早的鸟类,始祖鸟,生活在白垩纪前的侏罗纪时代。

6、According to another report, Chinese scientists have temporarily named this type of archaeopteryx fossil "the Divine Land Archaeopteryx".

另据悉,中国科学家将这类始祖鸟化石暂定名为神州始祖鸟。

7、Scientists have determined that Archaeopteryx, the earliest known bird, was definitely birdbrained, meaning no disrespect.

科学家已经确定,已知最古老的鸟类始祖鸟的确是鸟的脑子,这么说并不是对它不敬。

8、To support his hypothesis he pointed out that several fossils of the oldest known bird, archaeopteryx, lack feathers.

诺莱尔说：“羽毛确实是很难保存下来的东西。”为了证明这种观点，他指出，已知的最早的鸟类&始祖鸟的一些化石也没有羽毛。

9、Over the past 100 years, the world has totally discovered 8 archaeopteryx findings from the same period, and only confined to this area.

一百多年来，世界同时代的始祖鸟总共发现8块，且仅局限于这一地区。

10、First discovered in Germany in 1861, Archaeopteryx is a milestone species because it represents the transition between dinosaurs and birds.

于1861年在德国首次发现的始祖鸟是划时代的物种，因为它代表了恐龙与鸟之间的过渡。

11、Archaeopteryx is considered a prime transitional species in the evolution of some reptiles, probably dinosaurs, into today's birds.

始祖鸟被认为是从某些爬行动物，也许是恐龙，到今天鸟类的演变中重要的过渡物种。

12、In 1862 at the earliest finding of archaeopteryx in the state of Bavaria, Germany, it stirred the whole world.

一八六二年德国巴伐利亚州最早发现始祖鸟时，曾轰动全球。

13、For a long time, paleontologists weren't sure whether Archaeopteryx had feathers all over its body or just on its wings.

在很长一段时间里，古生物学者都不能确定始祖鸟是全身都有毛还是只有翅膀有毛。

14、China discovers archaeopteryx fossils

中国发现始祖鸟化石

15、The feathers found lining Archaeopteryx's body are symmetrical. Which sounds great, but it's actually asymmetrical feathers that are perfect for flight.

始祖鸟身上内层的羽毛是对称的，这听起来很不错，但其实非对称的羽毛才最适合飞翔。

16、So, Archaeopteryx probably evolved feathers to entice mates or communicate, which were then gradually "recruited for aerodynamic functions."

所以，始祖鸟进化出羽毛可能是为了吸引配偶或交流，之后才渐渐地“有了飞行功能”。

17、 However, this find of archaeopteryx fossils are from a much earlier age, lower in stratus and more primitive in features than previously discovered archaeopteryx.

而这次始祖鸟化石的发现，比先前发现的鸟化石时代更早，层位更低，特征更加原始。

18、 Thanks to its thick feather-shafts, most scientists do think Archaeopteryx could fly, but the newly discovered leg feathers wouldn't have played a great role in that.

由于它的羽轴粗大，大部分科学家都认为始祖鸟会飞，但最新发现的腿部羽毛可能对它的飞翔并不起多大作用。

以上是简答网为您整理的archaeopteryx怎么读的相关信息，希望对大家有一定的帮助。查看更多关于archaeopteryx的用法、archaeopteryx的释义、archaeopteryx的相关详情请点击：<https://dict.jiandongshicai.cn/archaeopteryx>
