Li Keqiang said that China's rail and aviation equipment and technologies are advanced, highly cost-effective and well-reputed in the international market. And China is willing to boost cooperation with Africa in these areas. Among other activities on Monday, Li also inspected a light-rail project in Addis Ababa together with Desalegn.

The Chinese-contracted project is the first of its kind in Ethiopia. Premier Li expressed confidence that Chinese projects will help boost the employment rate in Ethiopia.
