

《单词百科:NACS是什么意思?NACS怎么发音?NACS的解释和用法》

英语单词NACS是什么意思?NACS怎么读?NACS怎么发音?简答网为您整理了NACS的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

NACS的意思

- 1、abbr.National Association of College Stores 全国学院商店协会;
- 2、abbr.国家半导体顾问委员会;计算机软件数据与分析中心;海军先进通信系统(Naval Advanced Communications System)

NACS的双语例句

1、A new polyelectrolyte complex microcapsule formed by interaction between NaCS and PDADMAC was introduced.

介绍了一种由NaCS和PDADMAC通过 界面反应而构成的新型生物微胶囊——NaCS-PDADMAC生物微胶囊.

2、 If you require " NACS " to provide registered office, please tick the appropriate box.

如需“北亚”提供注册地址,请在方格内加“ ”号.

3、 Therefore, eight and ten character NACs are also called Universal Addresses.

因此,八至十个字符顾问委员会也称为通用地址.

4、 Formation Characteristics of NaCS/ PDMDAAC Biocapsule and Production of 1,3-propanediol by Encapsulated Cells

NaCS/PDMDAAC生物微胶囊成囊特性及固定化法生产1,3-丙二醇的研究

5、 Sensory and motor block, incidence of hypotension, blood gases of umbilical venous blood, Apgar score and NACS score of the neonates were investigated.

观察感觉和运动阻滞情况、血压的变化、新生儿脐静脉血气和Apgar、NACS评分。

6、 Results There was no difference in Apgar scores among three groups. NACS in group T 0 was higher than that in group T 1 (P 0 05) and in group T 2 (P 0 01).

结果三组新生儿Apgar评分无明显差异, T0组NACS明显高于T1组(P005)和T2组(P 001) ;

7、 The branching is found to be strongly detuning dependent in the vicinity of the NaCs near-wing satellites. Fine structure changing cross section has also been measured for resonant excitation of Na3~ 2PJ state. The results are discussed.

用对Na3PJ态共振激发的方法,也得到了精细结构转移截面,对结果进行了讨论。

8、 1,3-Propanediol production from glycerol by Klebsiella pneumoniae encapsulated in NaCS/ PDMDAAC capsules

微胶囊固定化克雷伯杆菌生产1,3-丙二醇

9、 Chitosan and sodium cellulose sulfate (NaCS) are both derivatives of natural polysaccharides with abundant resources. The combination of the two polymers could form polyelectrolyte complex (PEC) insoluble in water.

壳聚糖和纤维素硫酸钠都是来源广泛的天然多糖衍生物,两者结合能够形成不溶于水的聚电解质复合物。

10、 CMC-NaCS/ PDMDAAC microcapsule succeeded to the advantages of NaCS/

PDMDAAC in continuous immobilized cell culture and showed regulation in thickness and mechanical strength.

CMC-NaCS/PDMDAAC微胶囊膜厚和机械强度可以调节，适合于固定化细胞。

11、Higher elongation at break of the complex films would be obtained with chitosan of higher Mw. Meanwhile, the increase of the Mw and substitution degree of NaCS would cause the decrease of the swelling ratios.

壳聚糖分子量越高，该复合膜的断裂伸长率越大；而NaCS分子量和取代度的增大则会导致该膜的溶胀率降低。

12、The optimal conditions of reaction for preparation of sodium cellulose sulfate (NaCS) were found by the method of orthogonal design. Then the process was scaled up to 1L and 5L step by step.

用正交试验进行了500mL反应器制备条件的摸索，并将其逐步放大到1L、5L反应器中进行，确立了5L规模的生产工艺条件。

13、The program NACS can be used directly to predict critical flutter wind velocity of bridges.

桥梁设计人员可以直接应用NACS程序方便快捷地预测桥梁的颤振临界风速，也可供桥梁抗风研究应用。

14、The mechanical properties of NaCS film were significantly influenced by NaCS Mw, however, were less influenced by NaCS DS. The tensile strength and elongation at break would decrease when carrageenan or agar was added in NaCS film.

研究发现NaCS分子量对膜的拉伸强度和断裂伸长率影响较大，而NaCS取代度则对其影响较小。在NaCS膜中加入卡拉胶或琼脂后，膜的力学性能会下降。

15、Objective To determine the effects of epidural analgesia in labor on maternal serum prolactin and neonatal neurologic and adaptive capacity scores (NACS).

目的研究硬膜外分娩镇痛对产妇血清泌乳素(PRL)和新生儿神经行为与适应能力(NACS)的影响。

16、The characterization of reductive transformation of nitroaromatic compounds (NACs) by Zero-valent iron (ZVI) and the correlation between reductive transformation rates and molecular connectivity indexes (MCI) were investigated.

研究了零价铁(ZVI)还原转化硝基芳烃(NAC)的特性以及还原速率与分子连接性

指数 (MCI) 的关系。

17、 The results showed that the permeability of chitosan/ NaCS films was closely related to the swelling properties.

结果表明，壳聚糖/NaCS复合膜的渗透性能与其溶胀性能密切相关。

18、 Objective To observe the prevalence of abnormal blood glucose metabolism and explore the potential mechanism of influence of glucose abnormality on prognosis in patients with coronary artery disease (NACS).

目的探讨冠心病患者血糖代谢异常的发生率以及糖代谢异常对心血管事件发生和影响预后的可能机制。

以上是简答网为您整理的NACS怎么读的相关信息，希望对大家有一定的帮助。查看更多关于NACS的
