

《痛心！尼泊尔地震后古迹前后对比图（组图）》

The Dharahara Tower

These shocking photographs reveal the terrible toll the Nepal earthquake has had on some of the country's most beautiful and historic landmarks.

??

The monuments of Kathmandu, the capital of Nepal, are recognised as a UNESCO World Heritage site because of their unique architecture.

??

But several of the most recognisable buildings in the city, including towers and temples, now lie in rubble after a 7.8 magnitude earthquake.

????????????????????——??????——????7.8????????????????

The Dharahara Tower, which was first built in 1832, has been almost completely obliterated by Nepal's earthquake.

??1832????????????????????
