

《广东评职称打破“唯论文论”》

近日，广东省人社厅、省科技厅联合制定的《关于进一步改革科技人员职称评价的若干意见》（下称《意见》）正式实施，就“唯论文论” (paper-centric)的职称评审体制进行改革。

???????????

From now on, the evaluation of professional titles for scientific and research personnel in Guangdong will no longer be paper-centric but featuring more variety to apply.

??“????”?

??(high or new technology)????????(achieve technology transfers)????????????????(patents)????????????????????????????(publishing a paper)???

Experts have pointed out that the majority of published papers in China have little worth, except to meet the professional title requirement, and the majority of scientific and technological results fail to be transferred to industry for practical use.

??

This change to the professional title assessment system will be conducive to promoting better scientific and technological research for the benefit of society.
