1、monster adj.巨大的,庞大的;(建筑物)巍峨的;

## hippocampus的双语例句

1、 Objective To study the MRI volume of the amygdala and hippocampus in patients with major depression.

目的探讨抑郁症患者海马及杏仁核容积改变特点.

2、 Qing years, Xiaodong Guan Yuci white hippocampus to produce curd is known far and near.

清朝年间, 榆次小东关的白海马, 以制作豆腐脑而闻名远近.

3、 BDNF in the hippocampus maybe involves in operant conditioned reflex of rats.

海马部位的BDNF可能与操作性条件反射的训练有关.

4、 OBJECTIVE : To observe the changes of choline acetyltransferase activity in rat hippocampus after ischemia reperfusion.

目的: 观察大鼠脑缺血再灌注后海马组织胆碱乙酰基转移酶活力的动态变化.

5、 The contents of SOM in the hippocampus and cerebral cortex were increased in the experimental group.

与此同时, 海马及大脑皮质内SOM含量亦明显增高.

6、 Additionally, high ADC values were found in the hippocampus callosum, which connects the two cerebral hemispheres.

超越身体中线的动作可刺激胼胝体内三亿条轴突纤维, 胼胝体(连接左右脑的主要路径)被称为脑部超级高速公路.

7、 Focal ischemia also could raise the neurogenesis in hippocampus dentate gyrus.

局灶性脑缺血后亦可增加海马齿状回内神经发生.

8、 In addition, ZTE, Jiangling, hippocampus and other related models also have the intention calibration.

此外, 中兴、江铃、海马等相关车型也有标定意向.

9、 As a result, today's opening performance of the shares in the hippocampus worrying.

因而, 海马股份今天开盘表现让人担忧.

10、 The ADC values in the hippocampus were significantly correlated with worse memory performance scores.

海马区的ADC值与较差记忆能力分数(即记忆能力差)显著性相关.

11、 These findings provide evidence for the existence of a latent stem cell population in the hippocampus.

这些研究结果为海马中存在潜在的干细胞提供了证据.

12、 The echo of cortical activity was different in the three parts of the hippocampus.

皮层活动的重复在海马的三个部分是不同的.

13、 The gene is active in a region of the brain affected early in Alzheimer's, the hippocampus.

这个基因在迟发性老年痴呆症早期影响的大脑区域-海马体中有活性.

14、 Results; NF protein in the hippocampus only labeled some neurons.

结果: 在海马结构内并不是所有的神经元均可被神经丝蛋白所标记.

15、 Learning happens in the hippocampus a brain a key role in acquiring memories.

学习活动主要产生在大脑的海马体中,这个部位专门负责获取记忆.

16、 Northernblot analysis showed that SPARC mRNA was upregulated in a transient manner in the deafferented mouse hippocampus.

Northern杂交结果显示SPARCmRNA在去内嗅皮层支配的海马瞬时性上调.

17、 Objective : To investigate toxicity of ethanol extracts from hippocampus.

目的研究海马乙醇提取物的毒性作用.

18、 It observed the effects of treadmill running and cerebral ischemia on hippocampus neurogenesis of adult rats.

观察跑台运动和脑缺血对海马神经再生的影响.

以上是简答网为您整理的hippocampus怎么读的相关信息，希望对大家有一定的帮助。查看更多关于hippocampus的用法、hippocampus的释义、hippocampus的相关详情请点击：<https://dict.jiandongshicai.cn/hippocampus>
