irradiance的意思

1、n.发光, 光辉;辐照度;

irradiance的双语例句

1、The concepts of radiant emittance and of irradiance are complementary.

辐射的发射强度和辐照度是两个互补的概念.

2、Irradiance map + Light cache: the mostly used GI combination.

发光贴图+灯光缓存: GI的最常见的组合.

3、Irradiance calibration method and data processing method in PDP phosphors spectrum analysis technology is researched.

研究了PDP荧光粉光谱分析技术中的辐射标定方法和数据处理方法.

4、The cytomembrane penetrability also increases along with the strength of growth irradiance.

膜透性则随着光照强度的增大而增大.

5、Solar irradiance is not the only factor in determining PV cell lifetime.

但是寿命是由最短的因子决定的吧?

6、Irradiance or its equivalent, the plane radiant temperature, can be simply measured.

可以简单地量测辐照度或其当量 -- 平面辐射温度.

7、Solar irradiance decreases towards the poles.

太阳辐照率向两极递减.

8、The irradiance of solar energy impinging on the top of the atmosphere has a meridional distribution.

投射到大气顶部的太阳辐照度只有经向分布.

9、Study of Application of Wavelet Analysis to Neural Networks for the Forecast of Solar Irradiance.

小波分析在太阳辐射神经网络预测中的应用研究.

10、Emittance and irradiance are meaningful measurements of flux at a specific surface.

发射强度和辐照强度只有对一定表面上通量的量度才是有意义的.

11、Preliminary Results of Solar Irradiance at the Sea Surface Using Satellite Remotely sensed.

利用卫星遥感资料估算海面太阳辐照度的初步结果.
