

《未获许可的婴幼儿奶粉企业将于6月停产》

????????????6???

很快就不会有这么多中国婴幼儿奶粉生产商啦！国家食药局周五公布，没能获得许可的婴幼儿奶粉生产商将于6月停止生产奶粉。

There soon won't be as many Chinese producers of baby formula as there used to be. The China Food and Drug Administration said Friday that formula producers who can't get licenses will be forced to stop production in June.

"This round of approving production permits for formula makers has finished. By now, there have been 82 firms that have obtained the permits, while 51 other companies failed or applied to postpone the investigation and some of them withdrew from the industry," said Ma Chunliang, Deputy Director of China Food and Drug Administration.

The CFDA says that the 82 companies that gained permits spent nearly 2.5 billion yuan, or 400 million U.S. dollars, to improve their production quality.

Stricter permits unveiled by the CFDA aim to increase the standards for domestic infant formula products. The CFDA will keep a closer eye on the companies that have obtained formula permits and will closely supervise them throughout the entire production process.

Officials say there have been no recent bad-quality reports from investigations of both domestic and imported formula products in China.
