

《内存不用愁！iPhone 7最低配置32G》

导读:现在，苹果手机包括操作系统在内的一些数据很容易就占到了16G，这就使得低配玩家头疼不已，大呼内存不够用。不过此次苹果公司将作出改变，即将发售的iPhone 7的最低配置将是32G！

The next iPhone will not come with an option to have only 16GB of storage, according to the latest rumours.

Now another change has come to light, as a source speaking to the Wall Street Journal has claimed the starting point for storage will be 32GB instead of the current 16GB.

????iPhone 7????????????????????iPhone 7????32G????16G?

'Instead of 16GB as a starting point for the entry-level iPhone, the new starting point will be 32GB, according to a person familiar with Apple's iPhone plans,' the Wall Street Journal reported.

Getting rid of the 16GB option would be considered a positive move for Apple by many users who continue to run out of storage.

16G????????????????

The amount of content and data that is stored on phones these days, along with the space needed for essentials like the operating system, easily exceeds 16GB.

Apple has traditionally overhauled its flagship handset every other year - but that is set to change this year, the Wall Street Journal has claimed.

????????????????????--????????

It says the tech giant will offer only 'subtle changes' the the handset, including removing the headphone socket and making it slightly slimmer.

???????iPhone?“?”????????

'The biggest planned change in this year's phones is the removal of the headphone plug, which will make the phone thinner and improve its water resistance, said people with that matter,' it claims.

“????????iPhone?????iPhone 7?????”

Instead of a headphone socket, users will connect headphones wirelessly or via the lightning socket used mainly for charging at the moment, it has been claimed.

It has also been claimed the latest iPhone will come in a 'Space Black' colour scheme.

?????iPhone??????“???”?????

Macotakara make the claim, and 9to5Mac backed it up, claiming the previously seen dark blue colour is now likely to be black.
