

《新冠疫情防控相关词汇》

新冠肺炎疫情牵动着每个中国人的心，也改变了人们的生活。

????????“?”????????????????????????????!?

83-year-old Yuan Youju has recovered and been discharged from Leishenshan Hospital in Wuhan, capital of Central China's Hubei province, on Feb 18. [Photo by Wang Jing/chinadaily.com.cn]

???? fever clinic

???? designated hospitals

???

????????????????????????????????

All designated hospitals and fever clinics in the province are required to register the patient's information.

???? droplet transmission

???? contact transmission

???? fecal-oral transmission

???

??

We've made clear that the transmission routes of the novel coronavirus are through droplets and contacts, and the other transmission routes, such as through aerosol and fecal-oral, need to be further clarified.

???????

early detection and early isolation

???? medical observation

????? close contact

???? susceptible/vulnerable population

???? confirmed case
