

## 《单词百科:fibrinogen是什么意思?fibrinogen怎么发音?fibrinogen的解释和用法》

英语单词fibrinogen是什么意思?fibrinogen怎么读?fibrinogen怎么发音?简答网为您整理了fibrinogen的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

### fibrinogen怎么读

fibrinogen的读音:[fa br n d n]

### fibrinogen的意思

1、n.纤维蛋白原;血纤维蛋白原;

### fibrinogen的双语例句

1、The dynamic change of plasma fibrinogen ( Fg ) level in 40 patients with acute myocardial infarction ( AMI ) was observed.

观察40例急性心肌梗塞 ( AMI ) 血浆纤维蛋白原 ( Fg ) 水平的动态变化.

2、 Whole blood, plasma viscosity and fibrinogen were reduced.

全血粘度, 血浆粘度、纤维蛋白原数值降低.

3、 Objective To investigate the correlation between fibrinogen in pleural effusion and pleural adhesion in tuberculosis exudative pleurisy.

目的探讨结核性渗出性胸膜炎胸腔积液中纤维蛋白原含量与胸膜粘连的关系.

4、 APTT, ELT and fibrinogen were determined.

同时测定APTT、ELT和血浆纤维蛋白原的含量.

5、 Blood viscosity, plasma viscosity, aggregation index of RBC ( AIRC ) and fibrinogen were also assayed respectively.

还分别测定了全血黏度、浆黏度、细胞聚集指数 ( IRC ) 纤维蛋白原及血小板聚集率.

6、 Objective To explore the influence of concentrations of common antibiotics on the fibrinogen in plasma.

摘要目的研究4种常用抗菌素的浓度对血浆纤维蛋白原的影响.

7、 Hemorrheology often check blood viscosity, platelet adhesion and aggregation and fibrinogen, and other abnormalities.

血液流变学检查常有血液黏度, 血小板黏附和聚集性, 纤维蛋白原值等异常.

8、 Result The plasma viscosity and fibrinogen in group A are obviously higher than group B.

结果血浆粘度、纤维蛋白原两项指标存在显著性差异, 病灶组明显高于高危组.

9、 Objective to investigate the correlation between fibrinogen level and the degree of coronary arterial stenosis.

目的探讨纤维蛋白原水平与冠状动脉病变程度的关系.

10、 Results Blood viscosity , hematocrit and fibrinogen were remarkably decreased after gastric lavage.

结果洗胃后血液流变学多项指标显著下降,红细胞刚性明显升高.

11、 Conclusion: The results suggest that GMS has antiplatelet function and reducing plasma fibrinogen effects.

结论: 单甘酯有明显的抑制血小板功能和降低血浆蛋白原含量的作用.

12、 Aim : To investigate the changes of plasma fibrinogen ( Fg ) content in malignant tumor patients.

目的: 观察恶性肿瘤患者血浆纤维蛋白原 ( Fg ) 含量的变化.

13、 Fibrinogen of nohigh cholesterol setis original to ascend occupy 21 %.

非高胆固醇组纤维蛋白原增高者占21%.

14、 Objective : To observe the relationship between anticardiolipin antibodies ( ACAs ) and fibrinogen ( Fg ) in patients with thrombosis.

目的: 观察血栓患者抗心磷脂抗体 ( ACA ) 与纤维蛋白原 ( Fg ) 之间的关系.

15、 Objective : To observe the effect of Xuesaitong on hemorheology and fibrinogen of patients with cerebral infarction.

目的: 了解血塞通注射液对急性脑梗死患者血液流变学和纤维蛋白原的影响.

16、 Objective To discuss the role of fibrinogen in the pathogenesis of coronary heart disease ( CHD ).

马志祥,刘安丽,刘家恒, 张海燕, 陈鑫

[摘要]目的探讨血浆纤维蛋白原在冠心病发病中的作用.

17、 Results Fibrinogen of high cholesterol set is original to ascend occupy 80 %.

结果:高胆固醇组纤维蛋白原增高者占80%.

18、 The serum fibrinogen level was decreased significantly in the treatment group.

治疗组血纤维蛋白原水平降低显著,不良反应轻微.

以上是简答网为您整理的fibrinogen怎么读的相关信息 , 希望对大家有一定的帮助。查看更
