The screenshot shows the Grammarly interface. On the left, under 'Error tests new', there are three sentences with highlighted errors: 'Waat 'bout this sentences?' (spelling and determiner), 'do you thinks it's O K?' (verb and capitalization), and 'anyways, I'd be simply grateful for your assistances.' (adverb and noun). On the right, the 'All alerts' section lists these errors: 'Waat - Correct your spelling', 'this sentences - Change the determiner', and 'do - Capitalize the word'. A 'FORMALITY' alert for 'bout' is also shown, suggesting 'about' as a more appropriate word in this context.
