

《单词百科:Lysosomes是什么意思?Lysosomes怎么发音?Lysosomes的解释和用法》

英语单词Lysosomes是什么意思?Lysosomes怎么读?Lysosomes怎么发音?简答网为您整理了Lysosomes的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

Lysosomes的意思

1、[医]溶酶体;

Lysosomes的双语例句

1、The drug suramin, which is used to kill invading trypanosomes, is accumulated in lysosomes.

用杀死侵入的锥虫的药物苏拉明, 在溶酶体中积累.

2、In alveolar macrophage the increasing secondary lysosomes are seen.

肺泡巨噬细胞次级溶酶体明显增多。

3、Podocytes contain elaborate Golgi complexes, copious rough and smooth endoplasmic reticulum membranes and lysosomes.

足包含详细高尔基复合体,丰富的粗和滑面内质网和溶酶体膜。

4、De Duve was able by 1960 to show that lysosomes were distinct particles, using centrifugation techniques.

德杜弗在1960年以前利用离心技术已能显示溶酶体是特殊的颗粒。

5、Both myxoviruses and lysosomes are equipped with enzymes which can degrade glycoproteins.

粘液病毒和溶解体均装配某些能分解糖蛋白的酶。

6、This be merely due to enzyme in transit to lysosomes after synthesis on rough endoplasmic reticulum.

这或许仅仅是由于那些粗糙型内质网上合成,而将输送到溶酶体的酶所引起。

7、There were lysosomes and endoplasmic reticulum in endoplasm, but it lacked Golgi body and mitochondria.

虫体有溶酶体与内质网,缺乏高尔基体和线粒体。

8、The nuclear membrane invaginates and lysosomes are internalized.

核膜内陷,于是溶酶体被内在化。

9、Lysosomes are also membrane bound and they contain the enzymes concerned with the breakdown of macromolecules.

溶酶体也为膜所包绕,含有分解某些大分子的酶。

10、Some sialic acid is on the external surface of lysosomes.

有些唾液酸位于溶酶体的外表面。

以上是简答网为您整理的Lysosomes怎么读的相关信息,希望对大家有所帮助。
