Beijing started to see rainfall on Tuesday morning, and authorities said more downpours are forecast.

????????????????????????????????????????

Tianjin and Shandong will also see heavy rain from Tuesday night, according to official local forecasts.

????????????????????????????????????????

More heavy rain is forecast to hit north China in the coming days, said the China Meteorological Administration. The National Meteorological Center has also raised its storm alert from yellow to orange.

????????????????????????????????????????????

China has a four-tier color-coded system for severe weather, with red being the most serious, followed by orange, yellow and blue.
