

《单词百科:centrifugation是什么意思?centrifugation怎么发音?centrifugation的解释和用法》

英语单词centrifugation是什么意思?centrifugation怎么读?centrifugation怎么发音?简答网为您整理了centrifugation的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

centrifugation怎么读

centrifugation的读音:[sentr fɪ 'geɪ n]

centrifugation的意思

1、n.离心法，离心过滤;

centrifugation的相关词组

1、differential centrifugation 差速离心(分离);

- 2、 equilibrium density centrifugation [医]平衡密度离心沉淀法;
- 3、 isodensity centrifugation [医]等密度离心 , 密度梯度离心;
- 4、 centrifugation potentials 离心势;
- 5、 zonal centrifugation 区带离心;
- 6、 sucrose gradient centrifugation 蔗糖梯度离心;
- 7、 moving boundary centrifugation [医]移动界面离心;
- 8、 buoyant density centrifugation [医]浮力密度离心;
- 9、 isopycnic centrifugation 等密度离心;
- 10、 preparative centrifugation 制备离心;
- 11、 continuous flow centrifugation 连续流动离心法;
- 12、 gas centrifugation 气体离心;
- 13、 density gradient centrifugation 密度梯度离心;
- 14、 refrigerated centrifugation 冷冻离心法;
- 15、 centrifugation separation [医]离心分离;
- 16、 albumin gradient centrifugation [医]白蛋白梯度离心;
- 17、 fractional centrifugation 分部离心分离法;
- 18、 moving zone centrifugation [医]移动区带离心;
- 19、 rate zonal centrifugation [医]速率区带离心 , 速度区带离心 , 差速区带离心;

centrifugation的双语例句

1、 The latex concentration is raised by evaporation or centrifugation.

通过挥发或离心作用提高胶乳的浓度.

2、 Centrifugation and cyclonic separation, separates based on density differences.

离心和旋风分离, 分离的基础上密度差异.

3、Twice centrifugation with $200 \times g$ force, 10 minutes and about 500 % concentration was the best.

2次离心法,以 $200 \times g$ 力离心10min制备的PRP, 血小板浓度为全血的500%左右为最佳.

4、The solid concentrate produced by centrifugation differs from that produced by filtration.

离心产生的固体浓缩物和过滤产生的浓缩不同.

5、A low-speed centrifugation removes large particles of cell debris.

低速离心除去大分子的细胞残骸.

6、Purification: Density Gradient Centrifugation (Sucrose & CsCl).

分离: 密度梯度离心法 (蔗糖 & 氯化铯).

7、This can be separated by centrifugation.

它可以用离心法分离.

8、De Duve was able by 1960 to show that lysosomes were distinct particles, using centrifugation techniques.

德杜弗在1960年以前利用离心技术已能显示溶酶体是特殊的颗粒.

9、Final purification of the virus by density gradient centrifugation procedures.

通过密度梯度离心最终纯化病毒.

10、Five zones were separated by improved discontinuous sucrose gradient centrifugation.

用改进的不连续蔗糖密度梯度离心法分离到五条带.

11、METHODS: Bacteria from CSF centrifugation with high speed.

方法: 采用高速离心法浓集脑脊液中的细菌.

12、Precipitates are usually collected by centrifugation at intervals.

常常是用离心法分段收集沉淀的.

13、 Because sedimentation & centrifugation are similar, both are discussed here.

由于沉降和离心相似, 这儿就放在一块讨论.

14、 Conclusion: High purity of MSC can be obtained by density gradient centrifugation.

结论: 密度梯度离心法分离获得的人胚胎骨髓间充质干细胞纯度高.

15、 Wheat leaf mitochondria are isolated with differential centrifugation.

用差速离心法分离绿色小麦叶片线粒体.

以上是简答网为您整理的centrifugation怎么读的相关信息, 希望对大家有一定的帮助。查看更多关于centrifugation的用法、centrifugation的释义、centrifugation的相关详情请点击: <https://dict.jiandongshicai.cn/centrifugation>
