1、n.光电导(性);

photoconduction的近义词

1、photoconductivity n.光电导性(率);光导电性;

photoconduction的双语例句

1、The photoconduction response under strong electric field is discussed.

本篇只讨论强电场下的光电导响应.

2、The abnormal photoconduction response of α -Si:H films with sandwich structure

在夹心结构 α -Si:H膜中的反常光电导响应

3、THE DYNAMICS IN PHOTOCONDUCTION RESPONSE OF AMORPHOUS SILICON() The Photoconduction Response under Strong Electric Field

非晶硅光电导响应的动力学研究 () & 强电场下的光电导响应

4、I-V curve of GaAs photoconduction detector irradiated by double beams of proton

双束质子辐照砷化镓光电导探测器的I-V特性

5、Experimental result demonstrated that the light effect is originated by the stable state photoconduction produced on the surface of the silicon chip.

结果表明光照影响是由硅片表面产生的定态光电导引起的。

6、Influence of a Trap on Photoconduction

光电导过程中陷阱的影响

7、The exponential gain, the diffractive efficiency, the response time, photoconduction and signal to noise ratio of the crystals were measured.

测试晶体的指数增益系数、衍射效率、响应时间、光电导和信噪比。
