

《中国部分省市检测出日本放射性核素》

Radioactive material has been detected in the air above Shanghai and other southeastern coastal areas, monitoring authorities said on March 28.

????3?28??

But the levels were "extremely low" and would not affect public health or the environment, they said.

????????????“????”????????????????????

According to the statement, experts said no protective measures were needed against the material, believed to have been dispersed through the air from the quake-damaged Fukushima Dai-ichi Nuclear Power Plant in Japan.

??

The committee said the detected levels of radioactive iodine-131 were below one-hundred-thousandth of natural background radiation and not considered harmful.
