

《北京新机场造型似“凤凰”，2019年将投入使用》

导读:北京新机场定位为“大型国际枢纽机场”，与首都机场相对独立运行，配合各自的基地航空公司构筑中枢航线网络，形成北京地区“双枢纽”。

Construction of Beijing's new international airport is progressing smoothly, with 60 percent of the concrete work finished. It will be put into operation in 2019, according to Zhu Wenxin, spokesperson for the construction team working on the airport.

Convenient transportation

?????

The new airport will facilitate more convenient transportation. Located in Beijing's Daxing district, the airport is 46 kilometers south of Tiananmen Square and 67 kilometers away from Beijing Capital Airport. Through expressways, intercity rails and high-speed rails, passengers can reach Tianjin, Baoding and Tangshan in one hour; Shijiazhuang, Jinan and Qinhuangdao in about two hours; and Taiyuan, Zhengzhou and Shenyang in three hours.
