

## 《美国西部大雪致交通受阻》

Winter storm has hit the west coast of the United States for days, affecting road traffics in many areas.

Earlier this week, multiple trailers had overset in the state of Nevada, due to the strong wind. While in west Washington state, heavy snow had made it hard to see nor drive on the road.

As a result, numerous cars were trapped on a single interstate, and had to wait in a long line. For some areas, the snowfall had exceeded 28 centimetres. The region is experted to receive more snow in the coming days.
