Wang Xiaojun, general director of the Long March-7 carrier rocket project from the China Academy of Launch Vehicle Technology, said China still needs to break several technological barriers to ensure affordability and safety. Otherwise China's space travel services cannot be competitive in the global arena.

??

The market value of commercial space travel in China is projected to reach 30 billion RMB (\$4.6 billion) annually by 2020, Xinhua reported, citing Hu Shengyun, a senior rocket engineer at China Aerospace Science and Industry Corp.
