This carbon-negative vodka is made from captured CO₂.

??????(??)????????????????

A new brand of vodka from a startup called Air Co. is made from captured CO₂ instead of yeast—and making a bottle of it is the equivalent of the daily carbon intake of eight trees.

????Air Co.??

“Our technology uses carbon dioxide and water along with electricity to create alcohol,” says Stafford Sheehan, an electrochemist and cofounder of the startup, which launched the product in a handful of bars, restaurants, and
